

# Vision Roller Shade System

## Operating System: Vision Clutch & Spring

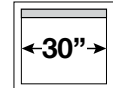

with standard clutch

MIN. WIDTH

with lift assist

MIN. WIDTH

### Features & Benefits

- Standard dual clutch for manual chain operated shades (drive and idle end).
- Simultaneous chain option on both sides.
- Clutch guide wheel prevents frayed fabric edges.
- Clutch and spring combination provides a smooth and effortless operation, relieves stress on the chain and sprocket eliminating chain breakage.
- Self lubricating delrin material reduces friction and extends the life of all movable components.
- Hardened coil spring optimizes tensile strength and torque power to maintain product quality over time.
- Counter balance system allows the shade to be pulled down by the Bottom bar without damaging the clutch.

### Lift Assist Mechanism Features & Benefits

- Lift assist mechanism reduces required pull force for finger tip control even on large shades.
- Vision built in lift assist mechanisms V15 to V120 customized for each shade by SG based on the blind size, thickness & weight of fabric to ensure the shade can be operated smoothly and effortlessly.
