Overview

Cellular Shades are versatile window coverings designed with a honeycomb structure that enhances energy efficiency while providing effective light control. The unique cellular design captures air in pockets, improving insulation and comfort in both residential and commercial environments.

Product Features

- **Improved Thermal Performance:** Honeycomb cells trap air to help moderate indoor temperature
- **Energy Savings:** Can reduce energy costs by increasing insulation
- **Day & Night Options:** For ultimate flexibility, the Day & Night Simply Cellular Shade allows you to transition between two fabric types, light-filtering and blackout, in a single shade.
- **No-Drill installation Option:** For easy setup without permanent mounting.
