WELCOME TO SUN GLOW

Since our inception in 1983, Sun Glow has dedicated itself to the meticulous design and crafting of premium window shades. Our commitment to excellence extends to delighting our customers and surpassing their expectations at every turn. As the President of Sun Glow, I take immense pride in our skilled team and our locally crafted collection of window treatments.

At Sun Glow, our core values revolve around delivering exceptional quality, value, service, and expertise. Should you encounter challenges in finding the perfect window treatment, our dedicated Research and Development team and technicians stand ready to provide innovative solutions tailored to your needs.

I encourage you to explore our catalog, a showcase of solutions that reflect our unwavering dedication to excellence. Thank you for choosing Sun Glow for your window treatment needs. We eagerly anticipate the opportunity to illuminate your living spaces with our inspired creations.

Vivian Kanargelidis CPA, CA
President, CEO

Roller Shades

Stylish & Functional

Our roller shades transcend mere window coverings; they embody your distinct taste and individuality. Experience the elegance and ease of our user-friendly roller shade systems. Seamlessly control the level of light and privacy with smooth, precise operation. Choose from a variety of fabrics and operating systems tailored to your preferences.

Interlude

Elegance in Motion

Introducing Interlude, an innovative window treatment that seamlessly merges the functionality of blinds with the softness of shades, resulting in a one-of-a-kind and contemporary aesthetic. Featuring sleek horizontal bands of alternating sheer and solid fabrics, Interludes effortlessly balances light and privacy control while imparting a touch of sophistication to any room.

Illusions

Illuminate Your Space

Illusions, the epitome of sophistication and functionality in window treatments. These innovative shades seamlessly blend light control, privacy, and style into one elegant solution. Featuring a distinctive design, Illusions boast soft light filtering fabric vanes suspended between two layers of delicate sheer fabric. With a simple adjustment, align the vanes for enhanced privacy or tilt them to regulate the amount of natural light entering your space. Experience the perfect harmony of practicality and aesthetics with Illusions.

Dual Shades

Practical & Versatile

Experience the ultimate versatility with our dual roller shades, offering the perfect solution for softly filtered daylight, outward views, privacy, and deep sleep – all in one seamless system. Unlike single roller shades, our dual shades feature two distinct fabrics within a compact design, eliminating the need to compromise on your fabric selection. Both shades are discreetly concealed behind our Dual Shade Fascia, ensuring a sleek and polished appearance. With the unique design of dual shades, you have the freedom to choose from two distinct fabric panels that can alternate or align, creating various visual effects tailored to your preference. Additionally, options such as single-layer interlude or illusions further enhance control over light and privacy for added customization.

Roman Shades

Timeless Style

Roman shades effortlessly evoke an elegant ambiance, even when fully retracted. Whether you're seeking to elevate a living room, bedroom, or any other space, these shades impart a refined and polished atmosphere to any environment. Roman shades imbue rooms with a luxurious and sophisticated aura. While they appear simple when lowered, as the shade is raised, pillowy volumes of soft fabrics cascade and stack, creating an exquisite visual effect.

Panel Track

Distinctive & Dramatic

Introducing Panel Track, the modern solution for stylish and versatile window treatments. These sleek and contemporary panels offer a clean and sophisticated look to any space. With their wide panels that glide effortlessly along a track system, Panel Tracks provide effortless operation and precise light control. Perfect for large windows, patio doors, or as room dividers, Panel Track offers both functionality and aesthetic appeal. Choose from a variety of fabrics, textures, and colors to complement any decor style. Panels can be configured to open from the left, right, or split in the center, offering customizable options to suit your specific needs and preferences. Experience the elegance and functionality of Panel Tracks, transforming your space with ease and style.

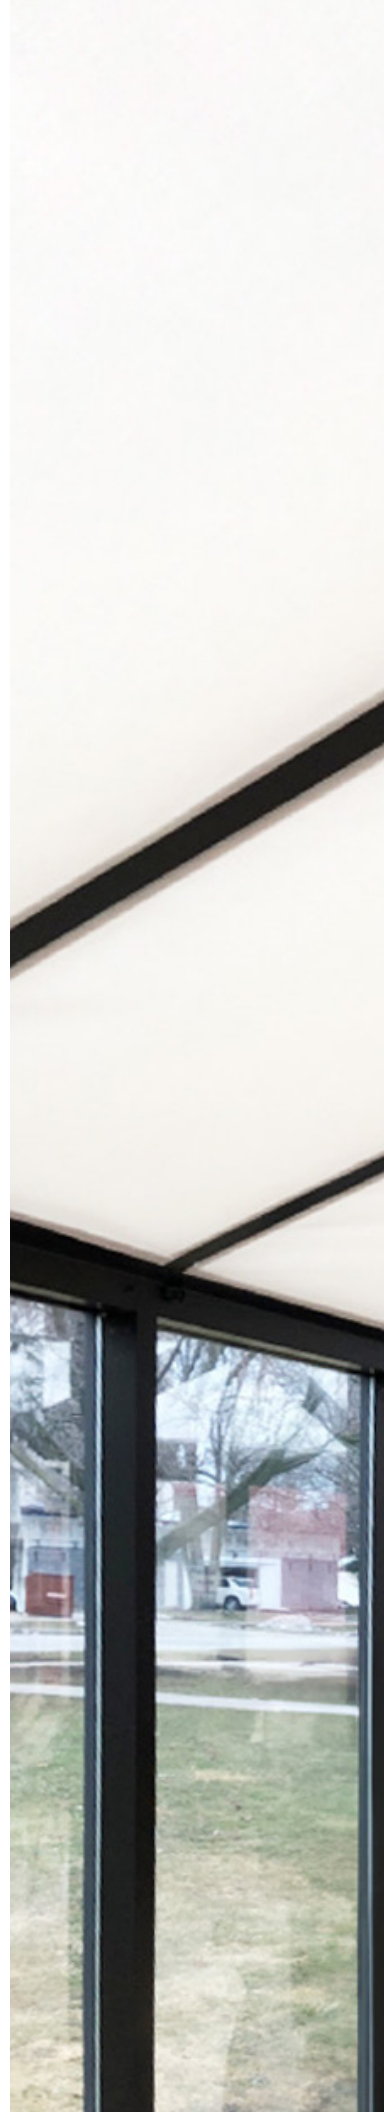

Cellular Shades

Energy Efficient

Experience the perfect blend of style and functionality with our advanced cellular shades. These shades offer superior protection against harmful UV rays, preserving the vibrancy of your interior furnishings. The honeycomb shape of the fabric cells have excellent insulating properties, reducing heat loss in the winter and heat absorption in the summer, lowering your energy costs. In addition, external noise is minimized, ensuring a serene and comfortable atmosphere. Crafted from high-quality, anti-static dust resistant fabrics, our shades maintain their pristine appearance.

Fixed Shades

| Custom Fit

Fixed shades are custom-made, stationary window treatments designed for windows with unconventional shapes or architectural challenges. They are affixed to the window frame, providing a seamless fit for arches, angled, inclined windows, or large glass surfaces like those in solariums. Beyond their sleek, integrated appearance, fixed shades offer durability and low maintenance while enhancing energy efficiency by reducing heat gain and protecting interiors from UV damage.

Vertical Sheer

| Sheer Beauty,
Vertical Precision

Vertical Sheer Shades are elegant and functional window treatments designed for large windows and patio or balcony doors. They feature vertical fabric panels that glide along a track and stack to the side or split in the centre to allow easy access to doors while providing light filtering and privacy. These panels are lightweight, washable, and replaceable for simple maintenance.

Side Stack

All vanes stack neatly to one side (left or right) when opened. This option keeps the opening clean and unobstructed, making it ideal for sliding doors or when you want full access to one side of the window.

Stack at Will

The most flexible system—vanes can be positioned anywhere along the track. You can partially open, center, or offset them however you like, giving you total control over light, privacy, and design.

Center Split

The vanes split evenly from the center and stack to both sides. This creates a balanced, symmetrical look—perfect for large windows or when you want a classic, elegant opening style.

Rise to Privacy

Atlas 2.0 Bottom Up

Through a simple inversion of the roller shade, Atlas 2.0 achieves a harmonious blend of daylight and privacy. Covering windows from bottom to top obstructs sightlines, while the top opening allows the welcoming warmth and radiance of natural light. Notably, Atlas shades are exclusively available with automation for added convenience and ease of use.

Shade the Sky

Nimbus Skylight

Nimbus is the ultimate solution for skylight window treatments. With its advanced design, Nimbus offers precise control over daylight from any angle, ensuring optimal temperature regulation throughout the year. Available exclusively as a motorized system, Nimbus combines functionality with effortless convenience, providing you with the perfect balance of comfort and style.

Graphic Shades

Style your Shades

Whether you're seeking to maximize window space for additional marketing opportunities or aiming to achieve a truly personalized look for your home, our digital printing solutions can bring your vision to life. Our graphic shades boast crisp, colorful designs that are consistently impressive, ensuring a stunning and eye-catching display every time.

Custom Printing

Expressions
Wallpaper

Select a design, request a pattern match, supply your own artwork, or collaborate with our design team to craft something entirely unique. Sun Glow's Expressions Custom Wallpaper is tailored precisely to your preferences, adding an extra layer of ambiance to your space. With no minimum order quantities and panels that can be printed up to 53" wide, the possibilities are limited only by your imagination.

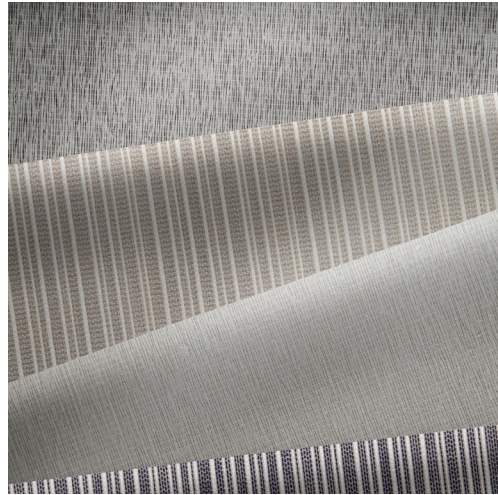

Fabrics

Transparent

Our diverse selection of transparent fabrics offers many options for your decorating needs. Our collection provides a variety of choices, all designed to offer a clear view outside and a gentle diffusion of natural light. These fabrics are especially well-suited for windows facing north, allowing ample natural light to filter in. Moreover, they seamlessly complement drapes, adding a touch of warmth.

Translucent

These fabrics cultivate a cozy and intimate atmosphere in your space, permitting the soft radiance of daylight to diffuse while preserving a sense of privacy. The light-filtering materials gently diffuse incoming sunlight, generating a soothing ambient light effect. In the evening with interior lights illuminated, only silhouettes are visible from the outside. Translucent fabrics also serve to safeguard your furniture, flooring, and other interior elements from fading or discoloration caused by prolonged exposure to sunlight.

Privacy

Privacy fabrics offer an ideal solution for bedrooms, bathrooms, or any space where windows overlook streets or neighbouring properties. Our collection features a wide array of patterns, tone-on-tone designs, multi-tone options, solid colors, and textures, ensuring you can discover the perfect fabric for your space. These privacy fabrics serve a dual function, providing both privacy and effective sunlight blockage. While a slight amount of light may filter through, there is no visibility from either the outside or inside, ensuring complete discretion.

Opaque

Rest & Darkening

Explore our wide array of Opaque fabrics designed to effectively block out sunlight, ensuring room darkening. Ideal for bedrooms, media or theater rooms, or any space where controlling light is paramount. Opaque fabrics promote optimal conditions for rest and relaxation.

Side Channels

While roller shades inherently feature a light gap, we offer side and bottom channels for those seeking absolute room darkening.

Sunscreen

Performance & Diversity

Sunscreen fabrics are specialized performance textiles designed to offer precise control over natural light. Our diverse range of sunscreen fabrics ensures suitability for any application. Whether your objective is to mitigate solar heat gain, shield interiors from harmful UV rays, or enhance comfort by managing glare and temperature, our sunscreens provide the ideal solution. Offering varying degrees of outward visibility through different weaves and openness levels, our sunscreens come in 1%, 3%, and 5% openness options. This translates to blocking 99%, 97%, and 95% respectively of the sun's rays from entering the interior while maintaining outward views. Various colors of sunscreens, even with the same level of openness, offer different degrees of outward visibility. Darker colors provide a crisper view compared to lighter shades. However, the trade-off is that darker hues absorb more heat from the sun, whereas lighter shades reflect more sunlight. Our DX sunscreen series presents an optimal solution, combining the benefits of color variety with practicality. With DX, the outward-facing side is uniformly white, providing an ideal choice for condominiums where white exterior-facing treatments are required.

Our wide range of colors for Sunscreen fabrics includes the sleek and modern black option. This color not only adds a touch of elegance but also provides effective light control and privacy. Black fabrics provide a crisp clear view to the outside even more so than an exposed window.

Reflect

Saving By The Square Meter

Reflective fabrics offer remarkable energy savings consistently over the years. While darker fabrics absorb and emit heat and lighter fabrics reflect it, the inclusion of reflective backing significantly enhances the solar control capabilities of any sunscreen, irrespective of its color choice.

Designer

Make a Statement

Elevate your interior design with our exclusive selection of designer fabrics. Crafted with meticulous attention to detail and unparalleled quality, our designer fabrics offer a timeless elegance that transforms any space into a work of art. From luxurious textures to captivating patterns, each fabric in our collection is thoughtfully curated to inspire creativity and sophistication.

Operating Systems

Somfy Automation

Sun Glow offers a comprehensive selection of Somfy systems, accessories, and components. Our team of experts guides and assists clients throughout the entire process, from selection to implementation. With options available in various sizes and technologies, our Somfy motors cater to projects of all scopes and dimensions. Control your Somfy motors effortlessly using a remote, an app, or voice commands.

Stealth Automation

Our Stealth Automation products boast sturdy motors equipped with bi-directional communication, solar power capabilities, and seamless integration into smart home systems. With our motors, home automation becomes both effortless and cost effective. Thanks to the latest Zigbee 3.0 protocol, you can now enjoy WiFi-based control through the intuitive Smart Life app, ensuring intuitive management of your smart home features.

Zero Gravity

Effortless Operation

Zero Gravity achieves flawless balance, effortlessly handling shades of any size or weight with ease. Whether your shades are light or heavy, operation feels virtually effortless. For windows that are high or out of reach, we offer a convenient clip and retractable wand option for added accessibility.

Experience seamless functionality with Zero Gravity.

Neo

Chainless System

Neo, a cutting-edge system available with most roller shade valances. Neo revolutionizes the way you interact with your shades, offering seamless operation and unmatched convenience.

Safety Shield

Safety of Children

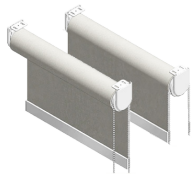

At Sun Glow, we understand the importance of protecting children in the home. We've created a range of products aimed at minimizing the risk of accidents associated with window coverings. Our Safety Shield allows for the use of chains while significantly reducing the chance of accidents.

Valance Options

Hanger & Closure

Conceal the Shade

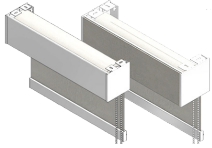

These systems are ideal when shades are mounted in above ceiling pockets. The hanger closure serves to conceal the shade when not in use.

Open Roll

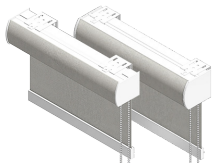

Our open roll shades offer a pleasing minimalist design. Reverse roll is optional and may prevent the shade from contacting window cranks and other obstacles.

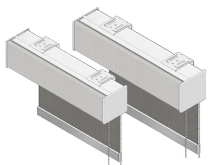

Fascia

Fascia is constructed from high grade aluminum and is available in various colours in a matte finish with matching bracket covers. The front profile of the both the 3" and 4" fascia can be wrapped with fabric to match the roller shade.

Curved Cassette

The Curved Cassette and the smaller Compact Curved Cassette are constructed from high grade aluminum and are available in various colours in a matte finish. They are attractive as is or select to have them wrapped in the same fabric as the shade for a stunning window treatment.

Square Cassette

The Square Cassette and the smaller Compact Square Cassette are fully enclosed valance systems that offer a uniform look. These cassette systems allow for seamless installation with no additional assembly on site. They can be fabric-wrapped and have reduced light gaps due to their integrated internal brackets. They are available for Roller, Interlude, Illusions, and Atlas 2.0 shade types.
