Roller Shades

Stylish & Functional

Our roller shades transcend mere window coverings; they embody your distinct taste and individuality. Experience the elegance and ease of our user-friendly roller shade systems. Seamlessly control the level of light and privacy with smooth, precise operation. Choose from a variety of fabrics and operating systems tailored to your preferences.

Dual Shades

Practical & Versatile

Discover the ultimate in versatility with our Dual Roller Shades — a seamless solution for soft daylight, privacy, and restful sleep. Featuring two distinct fabrics in one compact system, they eliminate the need to choose between function and style. Both shades are neatly concealed behind a sleek Dual Shade Fascia for a clean, modern look. Customize your light and privacy with alternating or aligned panels, or elevate functionality further with options like Interlude or Illusions.

Roman Shades

Timeless Style

Roman Shades bring effortless elegance to any space—even when fully raised. Perfect for living rooms, bedrooms, and beyond, they add a refined, polished touch to your décor. When lowered, their clean lines offer simplicity; when raised, soft fabric folds cascade in graceful layers, creating a luxurious and timeless visual effect.

Panel Track

Distinctive & Dramatic

Panel Track is the modern answer to sleek, versatile window treatments. Designed for large windows, patio doors, or room dividers, these wide panels glide smoothly along a track for effortless light control and operation. With customizable configurations and a wide selection of fabrics, textures, and colors, Panel Tracks bring both function and contemporary elegance to any space.

Fixed Shades

Custom Fit

Fixed Shades are custom-crafted, stationary window treatments designed for uniquely shaped or architecturally challenging windows. Perfect for arches, angled or inclined designs, and expansive glass surfaces like solariums, these shades offer a seamless, built-in look. With their durable construction and low-maintenance appeal, Fixed Shades enhance energy efficiency, minimize heat gain, and protect interiors from harmful UV rays.

Atlas 2.0 Bottom Up

Rise to Privacy

Through a simple inversion of the roller shade, Atlas 2.0 achieves a harmonious blend of daylight and privacy. Covering windows from bottom to top obstructs sightlines, while the top opening allows the welcoming warmth and radiance of natural light. Notably, Atlas shades are exclusively available with automation for added convenience and ease of use.

Nimbus Skylight

Shade the Sky

Nimbus is the ultimate solution for skylight window treatments. With its advanced design, Nimbus offers precise control over daylight from any angle, ensuring optimal temperature regulation throughout the year. Available exclusively as a motorized system, Nimbus combines functionality with effortless convenience, providing you with the perfect balance of comfort and style.

Graphic Shades

Style your Shades

To achieve a truly personalized look, our digital printing solutions can bring your vision to life. Our graphic shades boast crisp, colorful designs that are consistently impressive, ensuring a stunning and eye-catching display every time.

Fabric Opacity Options

Opaque

Opaque fabrics block light completely, creating a dark environment perfect for bedrooms or home theaters. Their dense layers also provide insulation, improving energy efficiency by reducing heat gain in summer and heat loss in winter.

Privacy

Privacy shades are perfect for bedrooms, bathrooms, or any space where privacy is key. Our collection offers a variety of patterns, colors, and textures to match your style. These shades block sunlight while ensuring no visibility from the outside, allowing a small amount of light to filter through without compromising your privacy.

Translucent

These fabrics create a warm, intimate ambiance, softly filtering daylight while maintaining privacy. They diffuse sunlight for a gentle, ambient glow and protect your interiors from fading. At night, only silhouettes are visible from the outside, enhancing both comfort and seclusion.

Transparent

Our see-through fabrics, including linen, textured, and sunscreen options, offer clear views and soft natural light. Ideal for north-facing windows, they complement drapes, adding warmth when open and privacy when closed.

Sunscreen

Sunscreen fabrics provide precise control over natural light, reducing solar heat gain and blocking harmful UV rays. Available in 0%, 1%, 3%, 5%, and 10% openness, they block 100%, 99%, 97%, 95%, 90% of sunlight respectively, with higher opennesses offering better outward visibility.

Valance Options

Hanger & Closure

These systems are ideal when shades are mounted in above ceiling pockets. The hanger closure serves to conceal the shade when not in use.

Open Roll

Our open roll shades offer a pleasing minimalist design. Reverse roll is optional and may prevent the shade from contacting window cranks and other obstacles.

Fascia

Fascia is constructed from high grade aluminum and is available in various colours in a matte finish with matching bracket covers. The front profile of the both the 3" and 4" fascia can be wrapped with fabric to match the roller shade.

Curved Cassette

The Curved Cassette and Compact Curved Cassette, made from high-grade aluminum, come in various matte finishes. Choose to keep them as is or wrap them in matching fabric for a seamless, stunning window treatment.

Square Cassette

The Square Cassette and Compact Square Cassette offer a sleek, uniform look with seamless installation and no on-site assembly. These cassettes can be fabric-wrapped and are designed with integrated internal brackets that help reduce light gaps.

Valance Wrapping Options

Wrapped Valance

A fully enclosed headrail with matching fabric cover for a clean, finished appearance.

Unwrapped Valance

A minimalist headrail for a sleek, modern look. Available in white, black, anodized, and linen.

Open Roll Options

Regular Roll

Fabric drops at the back

Reverse Roll

Fabric drops at the front.

Bottom Bar Options

Accubar 2.1

This slim bar offers outstanding stability and the perfect weight for any shade.

Wrapped Accubar 2.1

The Accubar 2.1 but with the interior face wrapped with the shade fabric for total coordination.

Plain Hem

Plain hem is a 1.75" welded pocket with an aluminum slat insert. The sides can be left unwelded or welded per your preference.

Mounting Options

Inside Mount

Inside mounting gives a clean, built-in look and allows draperies over the blind, but leaves small light gaps on both sides.

Outside Mount

Outside mount shades offer flexible valance options, fit shallow windows, visually enlarge openings, conceal imperfections, and ensure full coverage without light gaps.

Control Options

Chain

Simple, dependable, and colour coordinated. Roller Shades can be operated using a manual clutch and chain system. All chain-operated Roller Shades now include the Safety Shield child safety device.

Zero Gravity

The Zero Gravity spring perfectly balances the weight of the blind. The result is virtually effortless operation. Open or close the blind fully, or anywhere in between, with the lightest touch of a finger.

Motorization

Roller shades are compatible with a wide range of motorization and automation solutions from smart homes to building integration systems.

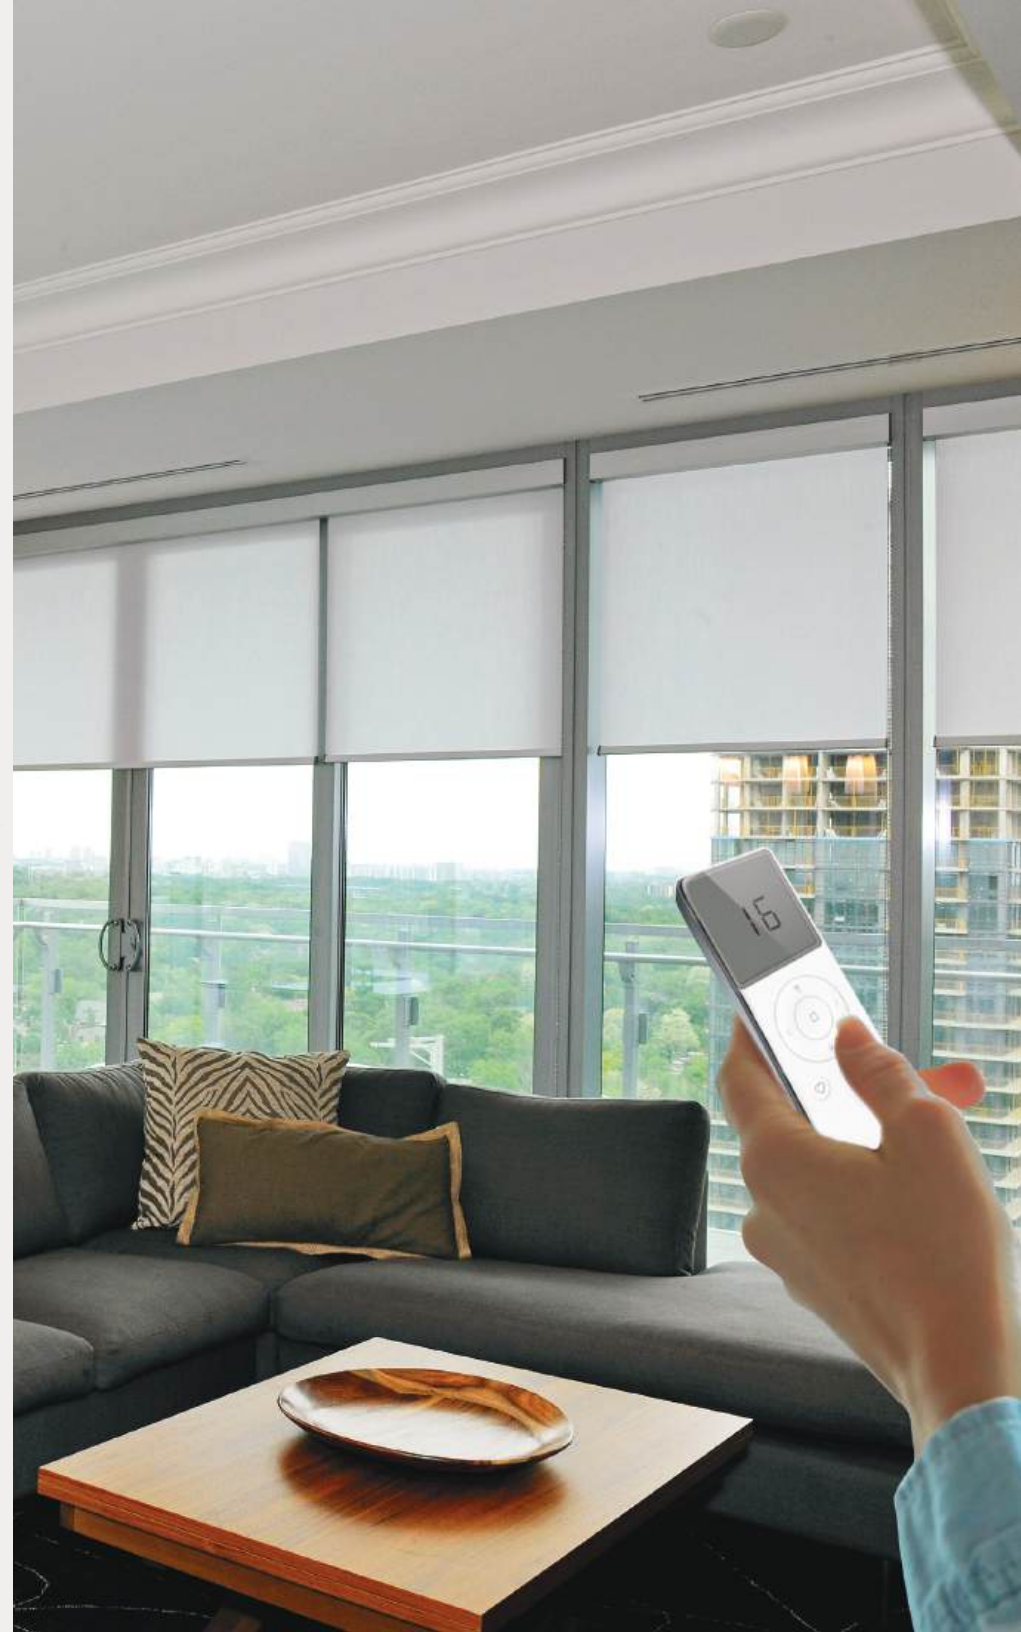

STEALTH
AUTOMATION

Effortlessly manage the amount of sunlight and privacy in your space with just a tap of a button. Plus, set the perfect ambiance with your voice and smart home device. Experience the ultimate in convenience and comfort today!

somfy®

We carries the full range of Somfy systems, accessories, and components. Our Somfy experts advise and support our clients all the way from selection to implementation.

Additional Light Controls

L Channel

L Channels reduce side light gaps, improving privacy and light control. Their sleek right-angle design blends into interiors and can be retrofitted to existing shades.

U Channel

U Channels block 99% of sunlight, ensuring a true blackout effect. Ideal for bedrooms, home theaters, and offices, they are pre-drilled for easy installation and support.

Design Options

Multi in One

Multi-in-One Shades provide a sleek solution for covering up to 3 adjacent windows under one continuous valance. Each shade operates independently with chain, zero gravity, motorized, or mixed controls.
