The Stealth Bridge combined with the Smart Life app enables WiFi based control via the Smart Life app for intuitive smart home control.

# Built-In Connectivity

The Stealth Bridge helps motors connect to WiFi based systems, but the Stealth Rechargeable and Stealth Flex motors feature built in Zigbee 3.0 communication, making them ideal for environments with cutting edge integration.

Zigbee 3.0 is the leading communication protocol for smart home communication.

It is a leading global standard to address the unique needs of low-cost, low-power, meshed wireless networks that powers the “Internet of Things”.
